

✓ "THE LONG WHITE TRAIL." ✓  
(Scenic) CLM 11236  
CLM 1123 JAN 21 1918

**L**APLAND lies almost entirely within the Arctic circle. Yet it has a railroad climbing over its ice fields and snow-capped summits. At one point it is 1,445 feet above the sea. It is the most northerly railroad ever constructed. This long white trail taps a country illuminated by the Aurora Borealis, whose inhabitants are supplied by the reindeer with milk, meat and clothing, and means of transportation. These reindeer are extremely economical, because they don't have to be fed. They live on lichens, which can always be found beneath the deepest snowbank.
